

Helen Langehanenberg

I have chosen
Prestige

The Prestige Helen saddle has been developed for the German champion Helen Langehanenberg.

The new tree is deeper than with any other Prestige model and it enables the rider to "sit deep" in the seat but without hampering the horse's movement. Its elastic membranes, positioned in the area of the ischia, make the seat extremely soft. The panels, too, are new and are made of a honeycomb structure material combined with a soft spongy fabric. These panels, with their anatomical shape, afford the utmost freedom of movement to the muscles of the trapezius.

The Prestige Helen is available with the following seat sizes: 16"-17"-18". The withers channel ranges between 29 and 37.
